

# Nature Networks & Pedagogy of Place

Environmental Education & First Peoples Principles of Learning Resource share - SD 57

VOL. 1, ISSUE 1

DEC/JAN.2018

## Highlighted Resources this issue:

## First Nations Education Steering Committee Resources

Have you checked out the teaching resources available to us developed by FNEESC? Whether you teach Elementary or Highschool, there is something for everyone to help support culturally responsive lessons.

Stay tuned for **Jan 28 Pro-D** - Learning Innovations will workshop one of the Units from "Science First Peoples- Gr. 5 - 9. Registration will be on PD Reg.

[www.fnesc.ca](http://www.fnesc.ca)

## ZONE IN - Manage technology & healthy living

A great big thank you to SD57 Occupational Therapist- Anik Provencher for sending on this resource. If you ever doubt the importance of taking your students outside- just look at this site. From developmental delays, to emotional and mental health issues, our students are suffering from not spending enough time outdoors.

Resources are available to help us. Check out-

## Prince George Naturalist Club

What a great way to learn about the natural history of this beautiful territory of the Lheidli T'enneh. Join seasoned Naturalists on events like winter caribou walks, evening programs on Amphibians of PG, or native plant, mushroom, or birding walks! If you want to increase your knowledge of the Natural History of PG for personal or professional development, this is a safe and supportive group to do it with!

## Biodiversity BC (UBC Geography dept.)

Looking for quality, scientifically accurate info for biology projects? This is a great data base of all living things in British Columbia! It includes sites called: "E-Flora" & "E-Fauna". If you or any of your students are researching animals or plants in BC, be sure to check out this site for pictures, life histories, distribution maps, endangered species listings, videos for kids and more!!
